

WCM Small Cap Growth Fund Fact Sheet – 31 December 2023

Objective

Long-term capital appreciation.

Our Investment Strategy

Normally, the Fund will invest at least 80% of its net assets in equity securities of domestic small capitalization companies. We consider small capitalization companies to be companies with market capitalizations within the range of those companies included in the Russell 2000 Index at the time of purchase. Investments in companies that move above or below the capitalization range of the Russell 2000 Index may continue to be held by the Fund at WCM's sole discretion.

Our Investment Process

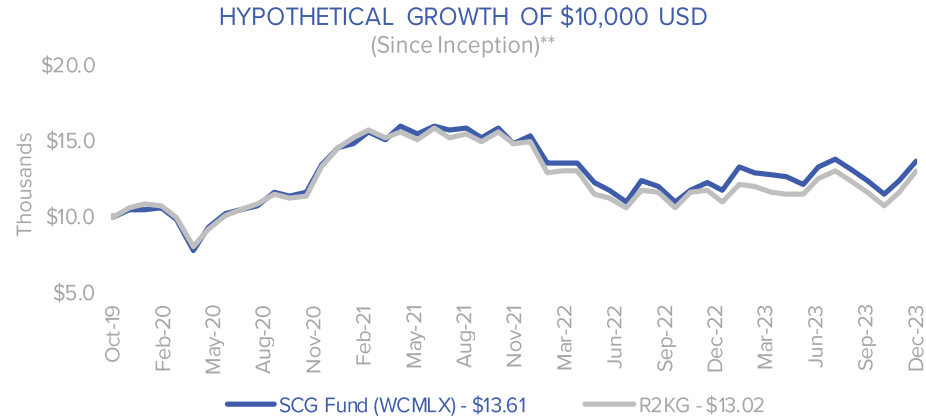

We use a bottom-up approach that seeks to identify companies with above average potential for growth in the rate of return on invested capital and assets. Our investment process seeks companies with:

- Sustainable and growing competitive advantages
- Corporate cultures emphasizing strong, quality and experienced management
- Potential for investment capital growth
- Attractive valuation

Our Philosophy

We believe attractive returns are achieved by finding businesses with inflections in the cash flow rates of return or the asset growth rates. These inflections can lead to significant value creation if they can be sustained. We seek businesses that possess an expanding competitive advantage demonstrated with an increasing Cash Flow Rate of Return on Investment (CFROI) and a Growing Invested Capital Base. As a business progresses through its life cycle we look to determine the sustainability of the margins and growth rates.

Performance

*Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. For the most recent month-end performance, please call 1.888.988.9801. Periods greater than one year are annualized. Return figures include the reinvestment of all dividends and income.

** Inception Date: October 30, 2019

*** The Fund's advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding any taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses (as determined in accordance with SEC Form N-1A), expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 1.24% and 0.99% of the average daily net assets of the Fund's Investor Class and Institutional Class shares, respectively. This agreement is in effect until April 30, 2033 and it may be terminated before that date only by the Trust's Board of Trustees. The Fund's advisor is permitted to seek reimbursement from the Fund, subject to certain limitations, of fees waived or payments made to the Fund for a period ending three full years after the date of the waiver or payment.

Active Share (%)	91.7	0.0

Sales Growth – 5 Year (%) is calculated using the compound annual sales growth rate for the last 5 historical years. CFROI FY1 (Current Year) is the ratio of gross cash flow to gross investments, which is then converted to an internal rate of return, in the current period.

CFROI Change (FY1-FY0) is the difference between the current year CFROI and last year's CFROI.

Asset Growth (%) is the year over year growth in inflation adjusted gross investment in an asset.

Present Value of Future Investment (%): The percentage of the total market value that the market assigns to the company's expected investment in growth.

Active share measures the extent of active management in a portfolio compared to the corresponding benchmark listed.

The Russell 2000 Growth Index (R2KG) provides float-adjusted, market capitalization-weighted indexes for a precise picture of the U.S. small cap growth equity market. It is not possible to invest directly in an index.
